ABSTRACT

The Office of Overseas Schools of the United States Department of State provides assistance to independent overseas schools which meet certain legislative criteria. The basic purposes of the assistance are to ensure that adequate educational opportunities exist for the dependents of government personnel stationed overseas, and to encourage and assist schools which demonstrate United States educational philosophy and practice within the countries in which they are located. The directory covers five geographic areas (Europe, Africa, Near East and South Asia, East Asia, and American Republics) with specific geographic locations listed alphabetically under each main area. The name and title of each school's chief administrator and the name, address, and telephone number of the school are given under each location listed. Also listed are the enrollment, the grades included in the regular program, and whether supervised correspondence work is offered at certain grade levels. The lists include the names and addresses of overseas schools which received direct or indirect assistance from the Office of Overseas Schools in Fiscal Year 1985. (BZ)

Revised January 1986

FOREWORD

The Office of Overseas Schools of the U.S. Department of State provides assistance to independent overseas schools which meet certain legislative criteria. The basic purposes of the assistance are a) to ensure that adequate educational opportunities exist for the dependents of U. S. Government personnel stationed overseas, and b) to encourage and assist schools which demonstrate American educational philosophy and practice within the countries in which they are located.

Each entry in the lists which follow gives the name and title of the school's chief administrator, followed by the name, address,* and telephone number of the school. The figures in parentheses indicate the enrollment and the grades included in the regular program. If supervised correspondence work is offered at certain grade levels, the designation "corres." is included. Thus, the notation "(392, K-11, 12 corres.)" indicates that the school has a total enrollment of 392, with regular instruction in Kindergarten through grade 11 and supervised correspondence study in grade 12. Information provided in this booklet is that available as of the date on the bottom of each page.

The lists include the names and addresses of overseas schools which received direct or indirect assistance from the Office of Overseas Schools in Fiscal Year 1985. It is not intended to be a complete listing of all international or American schools abroad; there are many other schools that do not meet the criteria for assistance from the Office of Overseas Schools or did not receive assistance in Fiscal Year 1985. (Locations, names, addresses, and other information concerning many of these schools may be obtained from the regional associations cited at the end of each geographical section.) Of the schools included in the lists, most follow basically American curricula and utilize English as the language of instruction. A number are binational or international in character, and a few are local schools or schools patterned after schools in countries other than the United States.

There are also U.S. military dependents' schools abroad which are operated by the U. S. Department of Defense. Information regarding these schools may be obtained from:
